Romotop®

GREMIO Tiled stoves

Regardless its conventional or rather rustic design, this unit is suitable for modern interiors as well. Tiled fireplace stove GREMIO feature perfect matching of shapes of ceramic tiles used for cladding. Several models of this fireplace stove with common technical base are on choice, however, each type makes an impression of its own.

Fireplace stove GREMIO is cladded with ceramic tiles in various glaze colours, depending on choice of the customer. It can be dominant unit of the room or perfectly fit with the adjacent room materials and highlight, for instance, the architecture of an old time country cottage. Tiled fireplace stove GREMIO is also suitable for low energy building structures. Thanks to EAI external air intake system into the hearth, interior air will not be used. As standard, stove design allows connection of flue gas exhaust on the top or in the back. Secondary air supply onto the inner side of the door is an efficient solution to avoid dirt deposits. The combustion chamber is cladded with fireclay fittings. Primary and secondary air intake is easily controlled by a one control element. The unit can be fitted with heat accumulation fittings, thus extending the time of heat radiation after the flame has extinguished.
