

HELIA Tiled fireplaces

Fascination of the fire in equilibrium with proportions and technology. Tiled fireplace HELIA is a sub-model of the SOLID range. HELIA is the right choice for small rooms, offering literally "wide-angle" view of the fire, thanks to several door glasses (in corner models, viewing also from the side). HELIA fireplaces are clad with hand-made ceramic tiles.

Ceramic cladding of the fireplace is made on three sides. HELIA tiled fireplaces are available with plane or corner hearth, right or left side design. They are also suitable for low energy houses. The combustion chamber is fitted with fireclay fittings. Standard design is with the grate, but it can be changed to a model without the grate. Innovative exhaust gas management system DOUBLE SPIN increases overall efficiency of the unit. Standard flue gas outlet is on the top or in the back. Secondary air supply onto the inner side of the door is an efficient solution to avoid dirt deposits, hence, you will not be distracted from viewing into the flames. Primary and secondary air control is made using one control element. Sufficient air for an optimum combustion process will be provided by the EAI system (external air intake from the exterior).

Technical parameters

Height	1412 mm
Width	722 mm
Depth	461 mm
Weight	237 kg
Regulated output	2,9-7,4 kW
Smoke flue diameter	150 mm
Flue socket diameter	150 mm
External air intake diameter	125 mm
Draught	12 Pa
Efficiency	85,7 %
Average wood consumption	1,6 kg/h
A+
