

The LAREDO fireplace stove is an impressive combination of high quality materials and design. It includes a full-glass door, glazed control elements and a personal style to make your home even cosier and more atmospheric.

LAREDO T Fireplace stoves

The beautiful and elegant LAREDO T fireplace stove provides a view of the flames from almost any angle.

This fireplace stove is suitable for low-energy homes. The stove door includes a large glazed area with a designer print. An EAI (External Air Intake) system is included. The standard version includes the option to connect an upper or rear flue gas exhaust. Thanks to the secondary air intake, the door glass is air-washed to prevent the cumulation of soot. The combustion chamber is lined with chamotte brick tiles. The primary and secondary air intakes are regulated by a single control element. The rotating combustion chamber allows you to view your fire from multiple angles. The design is accentuated by polished stainless-steel control elements and a full-glass door.
