

FANTASY Tiled stoves

In fireplace stoves **FANTASY**, impact has been put on **bright, modern design and workmanship quality**. **Well-balanced proportions, design door glass with open view of the flame invites to relaxation and enjoying the moment.**

Tiled fireplace stove FANTASY is clad with ceramic tiles. Several glaze colours are on choice, so you can easily match the stove with the interior of your room, where it can create its highlight or an elegant complement. Tiled fireplace FANTASY is also suitable for low energy houses. Thanks to EAI external air intake system into the hearth, interior air will not be used. As standard, the exhaust gas is discharged via a smoke outlet in the top or in the back of the unit. The secondary air led on the inner side of the door glass avoids dirt deposits. The combustion chamber is clad with fireclay fittings. Primary and secondary air intake is easily controlled by one control element. The stove can be fitted with heat accumulation fittings, thus extending the time of heat radiation after the flame has extinguished.
