

CARA CS N 03 Design fireplace with lifting door

The Romotop CARA CS N 03, a perfect minimalistic accumulation fireplace, has established a new trend in heating. An elegant phenomenon - thanks to its three-sided glazing, special details and optimal functionality, this fireplace will satisfy even the most demanding customers.

Indeed, this high quality fireplace is especially suitable for low-energy homes. The precise and light movement of the door, made possible through the SILENT LIFT system, complements it all. The rear shielding allows you to place the fireplace right next to a wall. An EAI (External Air Intake) system is included. The innovative DOUBLE SPIN flue gas system increases the stove's efficiency. The standard version includes the option to connect an upper or rear flue gas exhaust. Thanks to the secondary air intake, the door glass is air-washed to prevent the cumulation of soot. The combustion chamber is lined with chamotte bricks. It does not include a grate as standard, but this can be added on demand. The stove is connected to a tertiary air intake. The primary and secondary air intakes are regulated by a single control element. Additionally, you can purchase extra accumulation elements that radiate heat long after the fireplace has gone out. The fireplace prominently features varnished metal sheeting.
