

## **CARA R/L 03 Design accumulation fireplace with lifting door and bent corner glazing**

**The CARA R/L is a high quality fireplace which combines metal sheeting and glass, while the whole geometry of the combustion chamber is based on the letter “L”. The above-standard size of the glass in this corner stove offers a perfect view of the flames from multiple angles.**

The precise and light movement of the door, made possible through the SILENT LIFT system, complements it all. The rear shielding allows you to place the fireplace right next to a wall. An EAI (External Air Intake) system is included. The innovative DOUBLE SPIN flue gas system increases the fireplace’s efficiency. The standard version includes the option to connect an upper or rear flue gas exhaust. Thanks to the secondary air intake, the door glass is air-washed to prevent the accumulation of soot. The combustion chamber is lined with chamotte bricks. It does not include a grate as standard, but this can be added on demand. The fireplace is connected to a tertiary air intake. The primary and secondary air intakes are regulated by a single control element. Additionally, you can purchase extra accumulation elements that radiate heat long after the fireplace has gone out.

Bent glazing - right variant - order code: **CARA R 03**

Bent glazing - left variant - order code: **CARA L 03**

## Technical parameters

Height	1648 mm
Width	883 mm
Depth	601 mm
Door height	420 mm
Door width	583 mm
Door depth	311 mm
Weight	310 kg
Regulated output	3,9-10,1 kW
Smoke flue diameter	150 mm
Flue socket diameter	150 mm
External air intake diameter	125 mm
Axis height of rear outlet	1346 mm
Draught	11 Pa
Efficiency	82,9 %
Average wood consumption	2,2 kg/h
A+
