

ESQUINA N

We are sorry, but this model has been sold out and cancelled from our product range.

Please look at following alternative models:

- ESQUINA 3G steel - fireplace stove

The ESQUINA N fireplace stove is suitable for low-energy homes. An EAI (External Air Intake) system is included. The ventilated designer handle permits use when the stove is lit. The door can be locked in the open position. The standard version includes the option to connect an upper or rear flue gas exhaust. Thanks to the secondary air intake, the door glass is air-washed to prevent the cumulation of soot. The combustion chamber is lined with white MATRIX chamotte brick. The primary and secondary air intakes are regulated by a single control element. The lower part of the stove includes a storage area with a door for storing a small amount of wood or tools. Additionally, you can purchase extra accumulation elements that radiate heat for up to 5 hours.
