

RIANO 01 W

We are sorry, but this model has been sold out and cancelled from our product range.

Please look at following alternative models:

- ESPERA 01 ceramic - fireplace stove with water exchanger and double glazing
- ESPERA 02 serpentine - fireplace stove with water exchanger and double glazing
- ESPERA 03 steel - fireplace stove with water exchanger and double glazing

This hot-water fireplace stove will provide enough heat even for larger areas. Its highly efficient hot-water exchanger with a volume of 58l can transfer 70% of the heat into the water and 30% into the air. Moreover, the specially patented construction of the Triple Pass hot-water exchanger maximizes the energy transferred into the water. The standard version has an upper flue gas exhaust. Thanks to the secondary air intake, the door glass is air-washed to prevent the cumulation of soot. The combustion chamber is lined with chamotte brick tiles. The primary and secondary air intakes are regulated by a single control element. The lower part of the stove includes a storage area with a door for storing a small amount of wood or tools. The stove is equipped with a cooling loop.
