

The ALPERA fireplace stove is ready to meet the requirements of even the most demanding customers thanks to its multitude of shapes. All models are intended for low-energy homes.

ALPERA F Fireplace stoves

This stove's direct, clean lines result in a modern feel combined with minimalistic details. The timeless design means this ALPERA F stove will look great in your living room.

This fireplace stove is suitable for low-energy homes. An EAI (External Air Intake) system is included. The standard version includes the option to connect an upper or rear flue gas exhaust. Thanks to the secondary air intake, the door glass is air-washed to prevent the cumulation of soot. The combustion chamber is lined with chamotte brick tiles. The primary and secondary air intakes are regulated by a single control element. The lower part of the stove includes a storage area with a door for storing a small amount of wood or tools.
