

The shape and design of the EVORA fireplace stoves closely follow the latest interior design trends. EVORA is a great choice for a wide spectrum of customers and has become a highly popular model.

EVORA Fireplace stoves

Minimalistic, yet with a dominant shape. The EVORA fireplace stove is a perfect fit for all interiors as it does not take up any more space than strictly necessary.

This fireplace stove is suitable for low-energy homes. An EAI (External Air Intake) system is included. The standard version includes the option to connect an upper or rear flue gas exhaust. Thanks to the secondary air intake, the door glass is air-washed to prevent the cumulation of soot. The combustion chamber is lined with chamotte brick tiles. The primary and secondary air intakes are regulated by a single control element. The lower part of the stove includes a storage area with a door for storing a small amount of wood or tools.
