

The LUGO N fireplace stove will give your household a personal style. Its unique design combined with state-of-the-art combustion technology will lend your home a pleasant atmosphere.

LUGO N BF Fireplace stoves with oven

The perfect combination of the warmth of the hearth and great food is hard to resist. So why not treat yourself to the LUGO N BF fireplace stove that comes equipped with an oven? You deserve the best.

This fireplace stove is suitable for low-energy homes. The stainless oven with a high quality thermometer will always produce a perfect meal. The door can be locked in the open position. The ventilated designer handle permits use when the stove is lit. An EAI (External Air Intake) system is included. The standard version includes the option to connect an upper or rear flue gas exhaust. Thanks to the secondary air intake, the door glass is air-washed to prevent the cumulation of soot. The combustion chamber is lined with chamotte brick tiles. The primary and secondary air intakes are regulated by a single control element. The lower part of the stove includes a storage area with a door for storing a small amount of wood or tools.
