

RIANO W Fireplace stoves with water exchanger

Highly efficient RIANO W fireplace stoves with a large share of heat transferred to hot water will find applications even in larger interiors. The horizontal combustion chamber gives the stove a modern look and allows you to burn pieces of wood up to 50 cm long.

This hot-water fireplace stove will provide enough heat even for larger areas. Its highly efficient hot-water exchanger with a volume of 58l can transfer 70% of the heat into the water and 30% into the air. Moreover, the specially patented construction of the Triple Pass hot-water exchanger maximizes the energy transferred into the water. The standard version has an upper flue gas exhaust. Thanks to the secondary air intake, the door glass is air-washed to prevent the accumulation of soot. The combustion chamber is lined with chamotte brick tiles. The primary and secondary air intakes are regulated by a single control element. The lower part of the stove includes a storage area with a door for storing a small amount of wood or tools. The stove is equipped with a cooling loop.

order code: **RIANO 03W**

Technical parameters

Height	1086 mm
Width	820 mm
Depth	463 mm
Door height	581 mm
Door width	730 mm
Weight	291 kg
Regulated output	6,7-17,4 kW
Regulated output of water exchanger	4,7-12,2 kW
Smoke flue diameter	150 mm
Flue socket diameter	150 mm
Draught	12 Pa
Efficiency	83,4 %
Average wood consumption	3,7 kg/h
A+
