

The shape and design of the EVORA fireplace stoves closely follow the latest interior design trends. EVORA is a great choice for a wide spectrum of customers and has become a highly popular model.

## EVORA T Fireplace stoves

**The EVORA T fireplace stoves provides more than one point of view of the flames. The rotating combustion chamber allows you to view your fire from multiple angles.**

This fireplace stove is suitable for low-energy homes. An EAI (External Air Intake) system is included. The standard version includes an upper flue gas exhaust. Thanks to the secondary air intake, the door glass is air-washed to prevent the cumulation of soot. The combustion chamber is lined with chamotte brick tiles. The primary and secondary air intakes are regulated by a single control element.
