

The oval shape of the LUGANO fireplace stove lends your interior a cosy feeling. The design is accentuated by a fully glazed stove door.

LUGANO Fireplace stoves

Pleasant details such as a sill above the combustion chamber and a door handle give the LUGANO fireplace stove an elegant look.

This fireplace stove is suitable for low-energy homes. The stove door includes a large glazed area with a designer print. The ventilated designer handle permits use when the stove is lit. The door can be locked in the open position. An EAI (External Air Intake) system is included. The standard version includes the option to connect an upper or rear flue gas exhaust. Thanks to the secondary air intake, the door glass is air-washed to prevent the cumulation of soot. The combustion chamber is lined with chamotte brick tiles. The primary and secondary air intakes are regulated by a single control element. The lower part of the stove includes a storage area with a door for a small amount of wood or tools.
