

A spacious furnace and large-format glazing make the RIANO fireplace stove the perfect addition to any interior. The exquisite combination of small details with its robust frame ensure that RIANO stoves will stand out in every situation.

RIANO W Fireplace stoves with water exchanger

Highly efficient RIANO W fireplace stoves with a large share of heat transferred to hot water will find applications even in larger interiors. The horizontal combustion chamber gives the stove a modern look and allows you to burn pieces of wood up to 50 cm long.

This hot-water fireplace stove will provide enough heat even for larger areas. Its highly efficient hot-water exchanger with a volume of 58l can transfer 70% of the heat into the water and 30% into the air. Moreover, the specially patented construction of the Triple Pass hot-water exchanger maximizes the energy transferred into the water. The standard version has an upper flue gas exhaust. Thanks to the secondary air intake, the door glass is air-washed to prevent the accumulation of soot. The combustion chamber is lined with chamotte brick tiles. The primary and secondary air intakes are regulated by a single control element. The lower part of the stove includes a storage area with a door for storing a small amount of wood or tools. The stove is equipped with a cooling loop.

order code: **RIANO 03W**

Technical parameters

Height	1086 mm
Width	820 mm
Depth	463 mm
Door height	581 mm
Door width	730 mm
Weight	291 kg
Regulated output	6,7-17,4 kW
Regulated output of water exchanger	4,7-12,2 kW
Smoke flue diameter	150 mm
Flue socket diameter	150 mm
Draught	12 Pa
Efficiency	83,4 %
Average wood consumption	3,7 kg/h
A+
