

SALEM Fireplace stoves

The SALEM fireplace stove with a large door is for those who love a prominent and clear-cut design. This stove can create magic moments in every house.

This fireplace stove is suitable for low-energy homes. The stove door includes a large glazed area. An EAI (External Air Intake) system is included. The standard version includes the option to connect an upper or rear flue gas exhaust. Thanks to the secondary air intake, the door glass is air-washed to prevent the cumulation of soot. The combustion chamber is lined with chamotte brick tiles. The primary and secondary air intakes are regulated by a single control element. The bottom part of the stove can be used for storing a small amount of wood.
